Decorative Arts Editions

The Sol LeWitt work inspires this series, who was an artist linked to several movements, such as conceptual and minimalism art. Painting, drawing, photography and structures (a term he preferred rather than sculpture) where was a predominant artist.

OpC are metallic structures that creates a succession of unfinished cubes, whit lounched opal or transparent spheres like a light source. These structures are based

on his work, it allows us to create volume in horizontal or vertical arrangements to adapt in the space, giving a unique personality. It allows maximum customisation in any size and finish; from simple and open structures to high-volume structures.

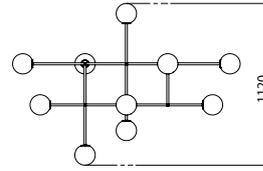

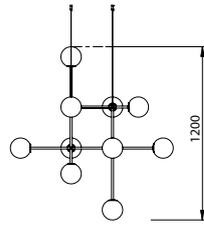

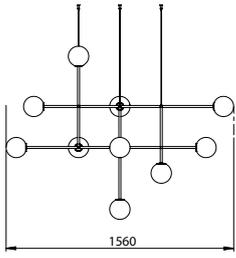

The collection includes pendant, sponce and ceiling luminaries.
