

# OPC\_

Design by David Abad.

Reference: OPC-12

Photo: Bronze brass finish / Opal Glass

Decorative Arts Editions

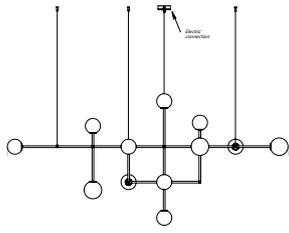

The Sol LeWitt work inspires this series, who was an artist linked to several movements, such as conceptual and minimalism art. Painting, drawing, photography and structures (a term he preferred rather than sculpture) were his predominant art.

OpC are metallic structures that create a succession of unfinished cubes, white lacquered opal or transparent spheres like a light

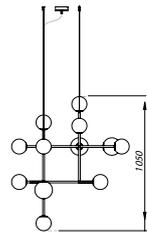

source. These structures are based on his work, it allows us to create volume in horizontal or vertical arrangements to adapt in the space, giving a unique personality. It allows maximum customisation in any size and finish; from simple and open structures to high-volume structures. The collection includes pendant, sconce and ceiling luminaires.
